

## Features

- Field interchangeable rocker and multi-button faceplates
- Change colors without removing switch from mounting box
- Combine load switching with UPB wall control functionality

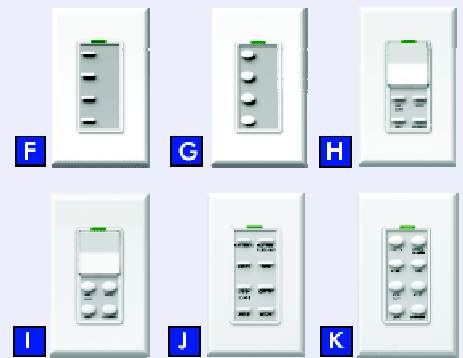

## UPB Benefits

- Higher reliability
- Lower system cost
- Individual home selective (no crossover/interference from adjacent homes)
- Phase coupling not required except in very large homes
- Easily configurable

## Applications

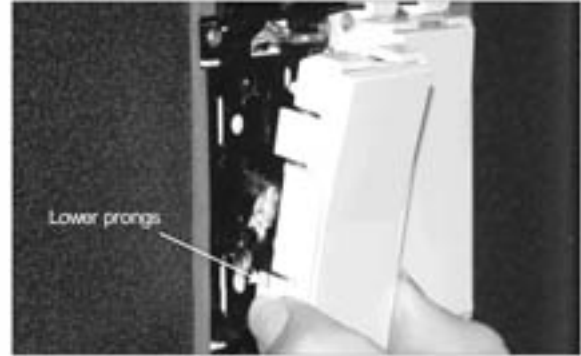

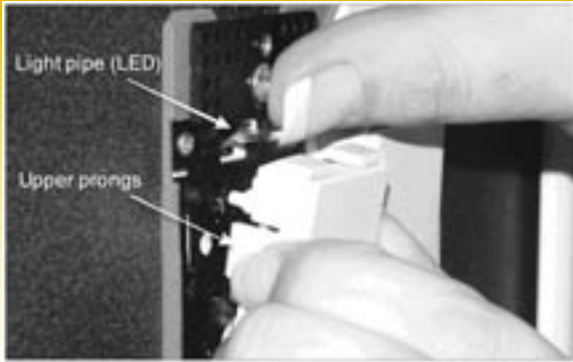

- Manually control whole house lighting and appliances, from a remote location within the home
- Easily control whole groups of lighting (scenes) from anywhere in your home
- Control functions based upon time/event programming when connected to Web Mountain NetPlace server

The **SW Rocker Faceplates** and **WC Multi-button Faceplates** can be installed in the field on the following Web Mountain modules:

	SW-111	SW-2	SW-311	WC-28BW	WC-28OW
<b>Rocker Faceplates</b>					
A SW-11 Single	√	√	√	√	√
B SW-21 Dual (Tall)	√	√	√	√	√
C SW-23 Dual (Short)		√		√	√
D SW-31 Triple		√		√	√
E SW-41 Quad		√		√	√
<b>Multi-button Faceplates</b>					
F WC-4B 4 Buttons, Thin Bar		√		√	√
G WC-4O 4 Buttons Oval		√		√	√
H WC-5B 1 Rocker, 4 Buttons, Thin Bar		√		√	√
I WC-5O 1 Rocker, 4 Buttons, Oval		√		√	√
J WC-8B 8 Buttons, Thin Bar		√		√	√
K WC-8O 8 Buttons, Oval		√		√	√

**NOTE:** To assure consistently reliable operation, we recommend a UPB phase coupler for every installation.

### Installation

Align the four prongs on the rocker assembly with the four slots on the switch body. Press the rocker faceplate assembly into the switch body.
